*Are you ...*

- Tired of buying over-conditioned yearling bulls that fall apart during the breeding season?
- Questioning if your yearling bull will be able to cover your mature cows?
- Afraid that your yearling bull won't be able to service very many cows?

*Join our mailing list  
for a complimentary  
sale book!*

**Carl Dethlefs  
& Sons Angus**

## *Why use an age-advantaged bull?*

**We do the hardest part for you.**

When you receive a Dethlefs bull, he is mature, in the right condition and ready to work. His hardest year is already past him.

**He will be able to:**

- Be trusted to service mature cows his first breeding season
- Be able to service many more cows his first breeding season
- Hold his body condition a lot easier throughout the season
- Last the whole breeding season, not wear out halfway through

## *Reasons to use Dethlefs bulls ...*

- We don't "push" our bulls, so they are not over-conditioned come sale time.
- They aren't in a lot. They are out on pasture getting plenty of exercise until sale time.
- Our cow herd is expected to survive the same way a commercial herd does – have good dispositions, calve unassisted, raise a heavy calf and re-breed in a timely manner year after year.
- We don't breed solely for EPDs. Instead we focus on breeding sound, functional cattle that look the part.
- We equally value growth, carcass and maternal traits in our cattle.
